

## Streetlight Power Tap Adapter

Solis Energy's LPT 100 Power Tap Adapter provides easy access to AC power by tapping into the electrical circuit used to power outdoor lights. This allows you to quickly attach and run any standard AC application, including Security/Surveillance cameras, WiFi and WiMax Radios, Traffic Monitoring or Solis Energy's AC>DC Outdoor UPS systems.

Our adaptor works with any electric light fixture that has a standard photo control locking type receptacle. The LPT 100 installs between the photo control or shorting cap and the receptacle and does not interfere with normal photo control operation. Connect your application with one of our fixed length cables or you can create your own custom length onsite with our attachable field adaptor.

### Perfect solution for your needs.

Easy to install	Long Term Reliability
<p>Our Power Tap Adaptor is engineered for fast, easy installation. Our simple "twist-lock" design allows quick installation and eliminates the need for special wiring by a certified electrician. Easy to remove and transport to other locations for interim requirements.</p>	<p>Our Power Tap Adaptor has a molded UV resistant enclosure and is built to withstand extreme weather conditions and temperature variations to provide continuous AC power to all your applications.</p>

### Solis Energy's Streetlight Power Tap Specifications:

<b>Max Voltage / Current</b>	300 V / 7 Amps
<b>Operating Temperature</b>	-20C to 85C (-4F to 185F)
<b>Protection</b>	UL 94 V-O material
<b>Weatherproof</b>	Rain tested per CSA C22.2 No. 182.3-M 1987, Sect 6.7
<b>Receptacle</b>	Brass, nickel plated
<b>Contacts</b>	Brass, gold plated
<b>Housing</b>	NORYL EN185
<b>Connector</b>	Female 4 conductor Mini-C
<b>Standard</b>	Conforms to ANSI C136.10
<b>Weight/Height</b>	< 1 lb. / Height 3 inches
